

PREPARE

REJUVENATE CLEANSING GEL

A lightweight gel cleanser to remove impurities and help to restore the skin's natural balance. Cleanses and primes the skin for 3 Step Hyaluronic Layering.

1. REVIVE

REJUVENATE DAILY SERUM

The next best thing to an Intraceuticals Treatment is a twice daily application of Rejuvenate Daily Serum. This first step visibly improves the appearance of skin texture, radiance and vitality. **Revives** and revitalises skin hydration for enhanced volume and defined facial contour.

2. REPLENISH

REJUVENATE EYE GEL

Like a big drink of water for the often neglected eye area, Rejuvenate Eye Gel hydrates, minimises the appearance of fine lines and helps to soothe the appearance of tired and overworked eyes.

REJUVENATE HYDRATION GEL

The second critical step is to continuously **replenish** hydration to the skin. Do this with a twice daily application of Rejuvenate Hydration Gel and notice how imperfections soften and skin gains a luminous, smooth look and feel.

3. PROTECT

REJUVENATE MOISTURE BINDING CREAM

The finishing touch is a thin application of Rejuvenate Moisture Binding Cream. This nourishing lightweight cream is designed to **protect** and defend against environmental stressors.

1. REVIVE

2. REPLENISH

3. PROTECT

WHY LAYER INSTEAD OF JUST MOISTURISE?

The original technology that goes into modern moisturisers was developed in the early 1900's and until now has barely changed. Because of this Intraceuticals has rethought skin hydration and focused instead on replenishing water-loving ingredients to the skin. By harnessing the power of three different weights of hyaluronic, Intraceuticals not only revitalises the skin's water attracting capabilities but helps replenish the skin's natural water reservoir.

Who wouldn't want instantly glowing skin that feels tighter and firmer, looks younger and more radiant?

HYDRATE – LIFT – TIGHTEN

REJUVENATE REJUVENATE

Recommended by Skincare Professionals,
Celebrities, Professional Make-up Artists, Photographers
and Stylists all over the world.

Maximise hydration and skin volume
Skin looks and feels younger and luminously radiant
Delivers effective anti-ageing ingredients

THE INTRACEUTICALS CONCEPT

Intraceuticals is a total skincare philosophy based on the concept that skin hydration is critical for vital, healthy looking skin. Intraceuticals recognised that dehydration is a major cause of fine lines, wrinkles and skin aging, and that Hyaluronic (natural water binding ingredients) help to elevate the hydration of the skin. So, based on cutting edge research, Intraceuticals developed their patented 3 Step Hyaluronic Layering. This forms the basis of the revolutionary Intraceuticals Treatments to provide instant, visible results; and scientifically advanced skincare, designed to revive, replenish and protect the skin.

3 SIMPLE STEPS TO DRAMATICALLY TRANSFORM THE LOOK AND FEEL OF YOUR SKIN

1. REVIVE 2. REPLENISH 3. PROTECT

DURING THE TREATMENT: The Applicator glides on an oxygen bubble over the skin, ensuring full application of Rejuvenate Serum to effectively hydrate the skin.

INTRACEUTICALS REJUVENATE TREATMENT

The Rejuvenate Treatment is a unique, reviving experience providing instant results you can see and feel. A professionally administered Rejuvenate Treatment uses the benefits of oxygen under pressure to promote the delivery of Rejuvenate Serum to the skin. Visible benefits include:

- Improved skin hydration and volume
- Instantly reduced appearance of fine lines and wrinkles
- Skin looks younger, luminously radiant and lit from within

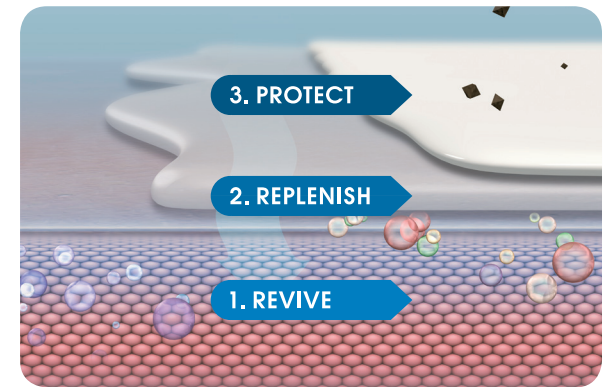

Rejuvenate Treatment is finished with an application of Eye Gel, Hydration Gel and Moisture Binding Cream to Replenish and Protect the skin.

THE REJUVENATE COURSE

Whilst a single Rejuvenate Treatment will instantly hydrate, lift and tighten the skin's appearance, optimum results are achieved through a course of 6 treatments. The Rejuvenate Course conveniently includes your daily use products to maximise the treatment benefits. Upon completion the skin will look and feel smoother, fine lines and wrinkles will appear visibly softened and your skin will glow with renewed firmness, radiance and vitality.

3 STEP HYALURONIC LAYERING

INTRACEUTICALS REVIVING SYSTEM

Low Weight Hyaluronic revives the skin. Boosting Hyaluronic levels helps to restore the skin's natural volume to noticeably define facial contours and reduce the appearance of wrinkles. Skin looks luminously radiant, lit from within.

- Rejuvenate Treatment
- Rejuvenate Daily Serum

INTRACEUTICALS REPLENISHING SYSTEM

Medium Weight Hyaluronic replenish water to the skin and provide long lasting hydration to minimise the appearance of fine lines and imperfections. Skin looks refined and clarified.

- Rejuvenate Hydration Gel
- Rejuvenate Eye Gel

INTRACEUTICALS PROTECTING SYSTEM

High Weight Hyaluronic protect the surface of the skin from dryness and harsh environmental factors by providing a breathable protective barrier. Skin feels supple and comforted and looks smoother and tighter.

- Rejuvenate Moisture Binding Cream
